EDUCATION

University of Ottawa   **Graduation-December 2019**
B.A.Sc. Software Engineering (COOP)   *Ottawa, ON*

- **Capstone Project:** Developing a data mining framework that leverages **Machine Learning** for Malware Classification with **Python, Apache Spark** and **Google Cloud Platform.**
- Worked on Software (**ROS** and **Python** in **Linux**) for Autonomous Boat in uOttawa robotics team.

SKILLS

Languages: Python, Java, JavaScript/HTML/CSS

Data Science: SQL, Data Mining, Spark, Machine Learning, Pandas, Elasticsearch, Logstash, Kibana, Grafana

Automation: Selenium, Cypress, Jenkins, JMeter, Linux, Windows

WORK EXPERIENCE

Kinaxis   **May 2019 – Aug 2019**
SaaS Performance Analyst   *Ottawa, ON*

- Collected data using **Python** scripts to store in a **PostgreSQL** database which was used to create **Grafana** reporting dashboard for cloud application performance metrics.
- Analyzed and forecasted SaaS performance KPIs using **Prophet** and **Python** for anomaly detection and monitoring.
- Developed a predicting tool using **ML** to determine hardware resources for potential customers with 90% accuracy.

Aetonix   **May 2018 – Aug 2018**
Software Developer   *Ottawa, ON*

- Integrated **Cypress.io** with **React Native** application to create a **JavaScript** test automation framework for **End-to-End testing** for remote health care application.
- Performed manual QA testing (cross-platform), managed bug life cycle and release iterations using **GitHub**.
- Applied knowledge gained from analysis and design of user interfaces course to improve UI/UX of the application.

IBM Canada   **Sept 2017 – Dec 2017**
Test Automation Engineer   *Ottawa, ON*

- Developed end to end centralized log analysis solution for Performance and Stability testing using **ELK (Elasticsearch, Logstash, Kibana)** along with integrating **JMeter** tests for real time analysis on the Cognos Analytics performance team.
- Created customized JMeter listener in **Java** so JMeter data can be analyzed and filtered in ELK**.**
- Improved automation by creating **Jenkins** jobs and bash scripts to run JMeter stability test cases in a synchronized manner and perform Elasticsearch maintenance.

Environment and Climate Change Canada   **Jan 2017 – April 2017**
Programmer   *Gatineau, QC*

- Developed and implemented data migration and conversion between EC Data Catalogue and Open Data Registry (**XML to JSON**) module with **FME workbench** and REST API to enhance **data extraction, transformation, and loading (ETL)** process.
- Successfully developed automated test cases using **Selenium** and **Python** which resulted in efficient testing of ECCC Data Catalogue.
- Improved **bulk data publishing** by writing Python scripts that reduced human effort.

Global Advantage Consulting Inc.   **June 2016 – Sept 2016**
Business Analyst   *Ottawa, ON*

- Created ecosystem maps in **Microsoft Visio** which analyzed the current state of the clean technology industry in Canada and individually created a map of the renewable energy landscape of Canada.
- Used functions such as sumif, vlookup, pivot tables, etc. in **Excel** to filter data and perform analytics.
- Provided **impact analysis** for process improvements, system modifications and data modifications.
